## Introduction to Flash CS4

**\$99**

Begin your career as a Flash designer! You'll learn the basics of developing Flash movies, such as getting around in the Flash workspace, creating text and graphics, and animating objects on the Flash movie stage. You'll master making interactive buttons with ActionScript 3.0, Flash's powerful programming language. We'll also cover how to use sound and digital video in your Flash movies, as well as create and animate 3-D objects. We'll explore syncing sounds with animations, inserting special effects, and publishing your Flash movies to the Internet. By the end of the course, you'll know how to use the Flash software to create and publish movies and applications, and you'll be well on your way to becoming a whiz with Flash.

**Requirements:**

- **Adobe Flash Pro CS4 Windows or Adobe Flash Pro Mac, Adobe Flash Pro CS4 Windows Upgrade or Adobe Flash Pro Mac Upgrade, or any Adobe Creative Suite bundle containing Adobe Flash CS4, all are acceptable (software must be installed and fully operational before the course begins).**
