

### **ASBESTOS REMOVAL**

Most College buildings and utility tunnels constructed before 1970 contain asbestos materials in some form or another. The most typical use is mechanical insulation's and other building materials. Generally, it is the policy of the College to remove and dispose of these materials, whenever a construction project is undertaken, to remodel a building or part of the project.

If during the course of remodel construction, suspicious material is discovered it is the duty of the Contractor to notify Edison State College immediately. The College, with the Contractor's assistance, will assess the situation and remove the material appropriately.

### **USE OF ASBESTOS OR PRODUCTS WITH ASBESTOS**

The use of asbestos or any product containing asbestos banned by the Environmental Protection Agency and Department of Labor's Occupational Safety and Health Administration is absolutely prohibited from this project. Any contractor installing any product with asbestos or neglecting to inform Edison State College of existing suspicious material discovered during remodel shall bear full responsibility and liability for any penalties, damages, suits or loss and shall pay for any and all costs of removal and replacement and also all legal costs if they are involved. Any product specified that unknowingly contains asbestos shall be brought to the attention of the architect in writing prior to its purchase and shall not be used.

**Note:** All products used on Edison State College projects must be in compliance with the most current applicable edition of the Florida Building Code.
