Dialysis Technician Program

This 50-hour Dialysis Technician Program provides students with the knowledge and skills needed to perform both the duties required of Dialysis Technicians. Under the supervision of physicians and registered nurses, Dialysis Technicians operate kidney dialysis machines, prepare dialyzer reprocessing and delivery systems as well as maintain and repair equipment. Furthermore, technicians work with patients during dialysis procedures, and monitor and record vital signs as well as administer local anesthetics and drugs as needed. Dialysis Technicians must also assess patients for any complications that occur during the procedure and must be ready to take necessary emergency measures including administering oxygen or performing Basic Cardiopulmonary Resuscitation. Additionally, they may also be involved in the training of patients for at-home dialysis treatment and providing them with the emotional support they need for self-care.

This program offers an Edison College certificate; it does not include a national or state certification as part of its overall objectives. Additionally there is no student internship or clinical rotation offered as part of this program

Dates: TBA

Time: Mondays and Wednesdays 6pm – 9:30pm

Cost: \$ 999, Textbooks included

Location: Edison College, Fort Myers Campus, room to be announced

Instructor: TBA

Seats are limited, so register today!

Advance registration and payment is required
