

## Center for Continuing Education

### Precious Metal Clay

Metal Clay is a term applied to several forms and types of metal powders mixed with organic binders and water to form a malleable material that can be shaped, molded or worked as a typical clay, dried then fired either in a kiln or with a torch with causes the binder to burn away leaving a finished piece that is pure metal.

Student will learn the basics for using the product. Items that are found in the home can be used as tools.
